

SUN VALLEY BLVD. PROJECT | SEGMENT 1 IMPROVEMENTS

FROM 7TH AVENUE TO HIGHLAND RANCH PARKWAY

LEGEND

- Milling Limits
- Roadway Reconstruction Limits
- New Sidewalk
- Drainage Linework
- Existing ROW
- 7th Avenue Intersection Improvements Include:
 - New signal pole
 - New turn lane
 - Utility work (undergrounding NV Energy)

Sun Valley Blvd., the heart of the Sun Valley community, provides access to neighborhoods, schools, services and businesses. This Regional Transportation Commission (RTC) project is designed to improve pedestrian and bicycle access, safety, and roadway conditions between 7th Avenue and Highland Ranch Parkway, a total of approximately 1.5 miles.

Improvements For safety and transportation choices, the project includes designated bicycle lanes, new sidewalks and lighted crosswalks, along with new and improved transit stops that meet the Americans with Disabilities Act (ADA) compliance standards.

Traffic flow will be improved at the 7th Ave. intersection with designated left turn lanes.

The roadway pavement north of 7th Avenue will be reconstructed with the addition of curbs, gutters and associated drainage inlets. Monument-style welcome signs will also be installed.

Utility and Drainage Impacts The improvements at the 7th Avenue intersection will require undergrounding of utility facilities. Drainage facilities will be perpetuated.

Cost and Funding The estimated range, including design and construction, is \$8,000,000 to \$9,000,000. The Project will be funded with local RTC fuel tax dollars.
